Allowable Subject Matter

2 Claims 1, 2, 4-14 and 16-21 are allowed.

The following is an examiner's statement of reasons for allowance:

Claim 1 recites, in part, "a **primary data acquisition circuit** for receiving data from at least a first sensing device indicative of a parameter associated with one of the following fluids: water, a cleaning solution or a disinfection solution, and a **secondary data acquisition circuit** for receiving data from at least a second sensing device indicative of said parameter associated with said fluid; said **secondary data acquisition circuit electrically connected with said primary data acquisition circuit**". This **unique combination of features in combination with the remaining claimed structure** avoids the prior art of record.

Claims 2 and 4-12 depend from claim 1.

Claim 13 recites, in part, "a **primary data acquisition circuit** for receiving data from a sensing device indicative of a parameter associated with one of the following fluids: water, a cleaning solution or a disinfection solution; and a **secondary data acquisition circuit** for receiving data from at least a second sensing device indicative of said parameter associated with said fluid; said **secondary data acquisition circuit electrically connected with said primary data acquisition circuit**". This **unique combination of features in combination with the remaining claimed structure** avoids the prior art of record.

Claims 14 and 16-21 depend from claim 13.

It is these limitations, which are not found, taught or suggested in the prior art of record, and are recited in the claimed combination that makes these claims allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
